

## Russian war with Ukraine, danger of nuclear accident after drone shut on reactor roof in Zaporizhzhia

In Zaporizhzhia, danger of a nuclear accident. In fact, yesterday, October the 8th, a drone has been shut down on the roof of a reactor. The place is now controlled by the Russian army. As a matter of fact, the Kamikaze drone was shot, in particular on a part of the nuclear reactor that already was out of use. As a consequence, Moscow accuses Ukraine

of evident responsibility. In fact, Russian representatives are threatening to attack and punish those who put nuclear facilities in danger. Moreover, in the general turmoil, we should remember the recent Moscow concert attack at Crocus City Hall, where hundreds of Russians died under terrorist fire. Latest news say that Moscow will refuse the Zelensky formula for peace. Therefore, since the beginning of 2024 more than 100.000 people have already enlisted for contract military service. In conclusion, official sources warn that Moscow could be preparing a new offensive.

## Israel, thirty Embassies close worldwide Threat of revenge from Iran after the Damascus attack

Firstly, all over the world, thirty Israel Embassies closed because of Iranian threats of raids. In fact, there are strong expectations of revenge after enemy senior officers were killed in an attack by Israel forces in Damascus. Moreover, Daniel Hagawii, Israeli army's head spokesperson, stated that the Israeli army is deployed in defence and

offense, with planes 24/7 in the sky, increasing the current tension with Iran. As a matter of fact, ancient Persia is a very well defended country, because of natural barriers, like high mountains, rivers and deserts and has created a "power belt" of controlled and friendly countries, reaching the Mediterranean Sea and increasing its power in the area.

## Our future is in Space

China wants to build a base on the moon and Russia is probably building a nuclear weapon in Space. These are just examples of the increasing importance of Space. In the future, probably, we'll have Space Wars. But, on the other hand, we could live on Mars without space suit, and we could visit Proxima Centauri and go out of the Solar System. For example, now the tycoons Musk and Bezos, with their economic empires, became part of Race Space developing private services for governments and privates. But the Space can't belong to anyone. Moreover, the Low Earth Orbit is strategic to control the planet and huge solar panels are placed there

and used for free energy. Space Wars could happen too. We are in this situation after United States, Japan, Emirates, Italy, UK, among other countries, unite on an agreement to save our planet Earth and look to Space opportunities. Historically the Race Space began in the 20<sup>th</sup> century with Germany and its first rockets. After Germany lost the Second World War the technology passed to the winning powers, Russia and USA. America was the first country to send astronaut Armstrong, walking on the moon. More recently, the International Space Station was built after the collaboration of Russian and Americans among other States

### Turkey, Kurd's victory. Mayor in the city of Van will be Kurdish

First of all, Ankara has just accepted the victory of the Kurdish mayor in the city of Van, Abdullah Zeydan, first removed. Initially the victory was not recognised. Consequently, Kurdish people have been protesting in the streets and more than 300 have been arrested. In fact, Turkey has always been between Europe and Asia, in a strategic location. Moreover, inside

Turkey there is a possible "hidden country" with a population of about 10 million people, who are Kurdish. As a matter of fact, they want to be independent. Therefore, the Turkish population and the Kurdish one are sometimes in fight. In conclusion, the Turkish media has announced that the decision is final, even if most of the Turkish people don't agree.

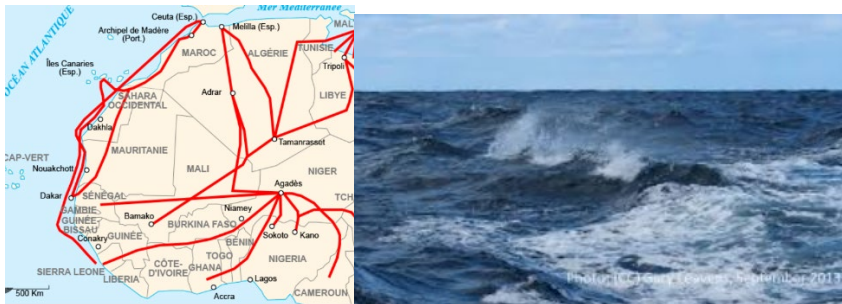

# Migration to Spain, sudden increase of arrivals to Canary Islands on the “Atlantic Route”

## Senegal receives drones and guards from Spain to curb boat departures

To begin with, according to the European Border Agency, irregular crossing nearly doubled as far this year to over 27.300 from Western African countries. In a comparison with the last year, there has been an increase of 95% of undocumented migrants and an increase of 111% compared to 2022, with an additional emergency accommodation.

According to an alarm phone call, it was reported that almost 1000 people tried to

cross the border between Morocco and Ceuta (that is in Africa but is a Spanish territory), with the consequence of many injured people. Moreover, two lifeless bodies were found on a boat in Tenerife carrying migrants. Similarly, many lifeless bodies were found on the boats near Canary Islands and Mauritania and a lot of disasters continue to happen. To sum up, Spain tries to stop boat departures from western African countries sending drones and civil guards to Senegal.

## The arm race in the Pacific, countries are afraid of a war

Tension is rising in the Indo – Pacific area. As a matter of fact, the US is giving missiles to friendly countries. For example, they created the “5 eyes alliance” among secret services in US, UK, Canada, Australia, New Zealand with the aim of defending against Chinese spying, that is unprecedented. Moreover, the US are boosting military cooperation with Canberra, the capital of Australia, sending them the last bomber B52. In fact, they want to be ready to react to episodes, such as the secret jet that overcame the Australian land to steal secrets. We should remember that the Australian population can’t grow much more, because of natural limits, such as the scarcity of water and the abundance of deserts. Moreover, Washington provides planes to other States. For instance, in September 2023 Taiwan submitted to have submarines

manufactured and from 2024 their request has been increased. On the other hand, the political situation in China might block or slowdown the expenditure on armaments. At the same time, the Taiwanese President was recently in the Australian city of Melbourne, to get to a closer defensive friendship, to be extended to other countries in south – east Asia. In addition, also the Philippines proposed an army modernization plan, to be carried out by the end of 2024, thanks to the delivery of many missiles. A strategic pact between US and Vietnam was signed too, due to the growth of Beijing’s national ambitions. Finally, the city of New Delhi, in India, plans to modernize equipment and make their defence industry stronger. Finally, Washington has confirmed that, from 2023, the US army could be able to use the Philippine military bases.

## Nature in Ethiopia, UNESCO recognizes the beauty of Africa's "water tower" with lakes and rivers

Ethiopia, a country in north Africa that counts for international tourism, due to nine sites recognized by UNESCO for their beauty. To start with, Ethiopia has 110 million inhabitants, going towards 130 million by 2030. As a matter of fact, it is the second most populated African country. To be noticed, first, is that humankind originated here. In fact, here were found the remains of Lucy, the hominid between man and monkey from 3 million years ago. Mainly tourism is important, with 10 percent of GDP, the value of what is produced by the country every year. As a matter of fact, this is thanks to mountains, tropical forests, deserts, nine Unesco heritage sites, such as millenary churches carved into the rock and waterfalls. One of the most famous attractions is the Ark of the Covenants: the original Israelite Ark is believed to be still lying in the ancient, famous church of Mary Zion in Axum, guarded by a monk who devotes his life to the task, it is off-limits to all persons, including kings and bishops. Water characterizes Ethiopia, it is called "Africa's water tower" with 12 large lakes and 9

large rivers, which then go to neighboring countries which depend on Ethiopia for water. Then there is the "African rift valley" of high mountains that crosses it, huge on Earth and visible from space, which creates enormous valleys covered with lakes and makes communications and connections in the country difficult, creating high waterfalls in the rivers. To the west, the mountains exceed 4,000 meters and among the rivers that originate here is the Blue Nile which then flows into Sudan and Kenya. To the east, the mountains descend more gently to Somalia, a country overlooking the Gulf of Aden. To the north there are Eritrea and Djibouti and beyond the Red Sea and on the border with Eritrea there is the Danakil depression, desert, one hundred meters below sea level, with temperatures of 50 degrees, among the hottest places on Earth, with a lake of volcanic lava, which gives the region the name of "gate of hell". In conclusion, Ethiopia is one of the most attracting countries because of its wild nature and important history.

## Israel, for US ceasefire conditional on hostages

### Erez crossing opens for aid to Gaza

Firstly, Israel is to be held accountable for war crimes, secondly Israel opens Erez crossing to bring aid to Gaza people.

But for Israel and Palestine, peace is possible. According to American government sources, there could be peace in the Gaza strip. The war will continue until the hostages will be

released; they report. Moreover, Israel is going to reopen crossings to bring aid to Gaza. In fact, one of them is the Erez crossing, and they are about to use the port of Ashdod. However, the UN confirmed that Israel could be held accountable for war crimes because of the Human Rights Court decision.
